NEW

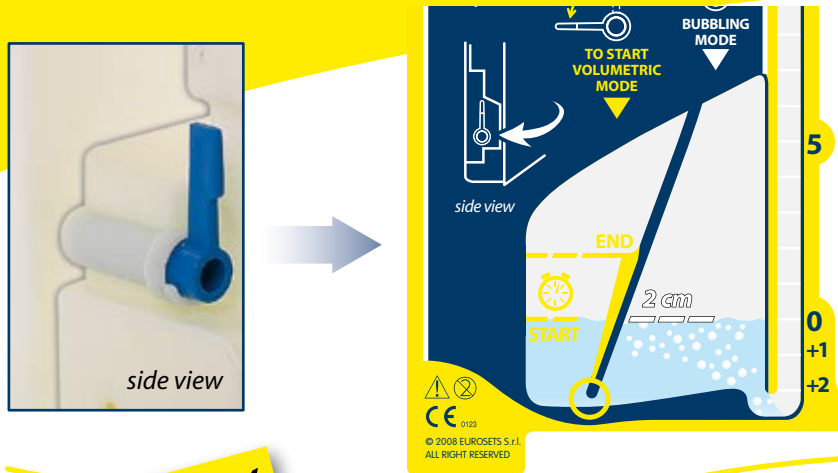

**THE FIRST
DRY SUCTION
CHESTDRAINAGE**

**WITH
INNOVATIVE
PATENTED
VOLUMETRIC
AIR LEAK METER**

INNOVATIVE UNIQUE VOLUMETRIC AIR LEAK METER

- It allows to **ACCUMULATE** the volume of Patient's air shed during time, thus, it helps to point out the "small" air leak, commonly not visible and managed with popular instantaneous systems
- It's a **UNIVOCAL METER**
- It maintains the **WATER SEAL PROTECTION**, besides, the drainage is always working, evacuating fluid and air from the pleuric-mediastinal cavity

BUBBLING MODE
(instantaneous
air leak monitor)
